

AMENDMENTS TO THE SPECIFICATION

Please revise paragraph [0004] of the specification as follows:

[0004] In the case of the bicycle described in Patent Document Japanese Patent Laid-Open No. Hei (1997) - 890121 Hei (1997) - 89012, a chain is wound around a large gear of a gear crank and a plurality of small gears installed at a rear hub, and a free wheel is installed at the rear hub. The free wheel is provided with an outer cylinder having said small gears connected in a relative unrotatable manner, an inner cylinder arranged inside the outer cylinder in such a way that it may be relatively rotated and connected to a hub member of the rear hub in such a way that it may not be relatively rotated, and a one-way clutch is arranged between the outer cylinder and the inner cylinder.
